

# We Are Open!

On March 24, Governor Evers issued an executive order directing Wisconsinites to stay at home, beginning Friday, March 25 through April 24. We understand how intimidating this sounds, and with the information about COVID-19 changing hourly, it can all be overwhelming.

We have confirmed that yes, veterinary clinics in Wisconsin are considered essential businesses and we will remain open during this “Safer at Home” period. Our curbside service will remain in effect, and we continue to see patients for most services.

If you have routine medications for your pet that you would prefer to have shipped to your home, you can purchase most pet supplies (including preventative medications, treats, and toys) through our online pharmacy found on our website.

Ensuring the health and well-being of our companion animals is our priority, and we look forward to continuing to serve both you and your pets during these trying times. If you have any questions, please do not hesitate to reach out to us.
