Glass Memorials

These glass memorial keepsakes are individually hand blown and sculpted in the United States by artists. Molten glass is at temperatures over 2000° F which is a higher temperature than most cremation processes. When the glass is molten, the cremains are carefully incorporated into the glass. Since glass is at a higher temperature than the cremains, the carbon is burned off and the cremains turn a brilliant white color within the glass.

Glass keepsakes are hand made using special coloring treatments during the creation process. Memorial colors may vary slightly.
